RESEARCH NOTE / 6 NOVEMBER 2026

PIMCO Income, UST 2041 and Temasek 2070

Yield, interest-rate sensitivity and what a Singapore-dollar hedge removes

The fund added 2.15 years of effective duration in one year.

PIMCO reported **5.21 years** in September 2025 and **7.36 years** in September 2026. The fund's **10.97 years** measures effective maturity. In September, the 5–10 year bucket accounted for **54.5% of total duration**. [1–3]

Yield and duration at the recorded dates

Investment	USD yield measure	Duration
PIMCO Income 30 Sep 2026	**8.37%** estimated portfolio YTM, before fees	**7.36 years** effective
UST 2.00% 2041 5 Nov 2026	**5.24%** gross YTM on a venue reference price	**11.7 years** modified
Temasek 2.50% 2070 30 Oct 2026	**5.551%** indicative ask yield on Bondsupermart	**18.934 years** modified

Sources [1–3, 7–10]. Fund statistics, exchange reference prices and dealer indications have different meanings and dates. POEMS showed a later Temasek ask yield of 5.508% on 4 November [11].

What 3.92% represents

8.37% − 1.45% − 3.00% = 3.92%. The first two inputs are documented. The third is the annual hedge drag used in the discussion. PIMCO's September E SGD-Hedged factsheet reports a **6.42% annualised distribution yield**. It gives no realised annual hedging cost for this class. [2]

What the holdings establish

At 30 June, the Income Fund held **two identifiable AI data-centre financings** with a combined reported weight of **3.011% of fund NAV**. They appear under project-company names. The appendix ranks 50 corporate issuers against the corporate allocation and their own credit-quality segments. [12, 15–18]

01 / SHARE CLASS AND YIELD

The SGD class reported a 6.42% distribution yield

The portfolio is managed in USD. E Income investors can hold a USD share class or a separate SGD-hedged share class.

Measure at 30 Sep 2026	E Income USD	E Income SGD-Hedged
Income share ISIN	IE00B8K7V925	IE00B9HH6X13
Portfolio estimated YTM, gross	8.37% in USD	8.37% in USD
Unified management fee	1.45% p.a.	1.45% p.a.
Annualised distribution yield	6.67%	6.42%
One-month total return	−3.45% in USD	−3.70% in SGD
One-year total return	−1.39% in USD	−4.07% in SGD

PIMCO factsheets [1, 2], pp. 1–2, 4–5. Returns are NAV-to-NAV with distributions reinvested, after fund expenses, before any investor-specific preliminary charge.

How each measure is built

8.37% measures the portfolio. PIMCO weights the yields of individual holdings by market value. The fund can trade its holdings and has no common redemption date. Changes in market prices, spreads and defaults affect what investors earn. [1, 2]

6.92% is a simple fee adjustment. Subtracting the E class's 1.45 percentage points from 8.37% gives 6.92%. Deducting that fee again from the published total returns would count it twice. [1, 2]

6.42% measures the SGD class's distribution rate. A distribution can draw on portfolio income or capital. PIMCO's USD class paid a different rate from the SGD-hedged class in the same month. [1, 2]

The 3.92% calculation depends on the FX input.

Under the stated **3.00 percentage-point** annual deduction, the fee-adjusted 6.92% becomes **3.92%**. A series of rolling forwards resets at successive market rates. The published return gap between the two classes also cannot, on its own, isolate the cost of those forwards. [2, 4, 5]

02 / INTEREST-RATE EXPOSURE

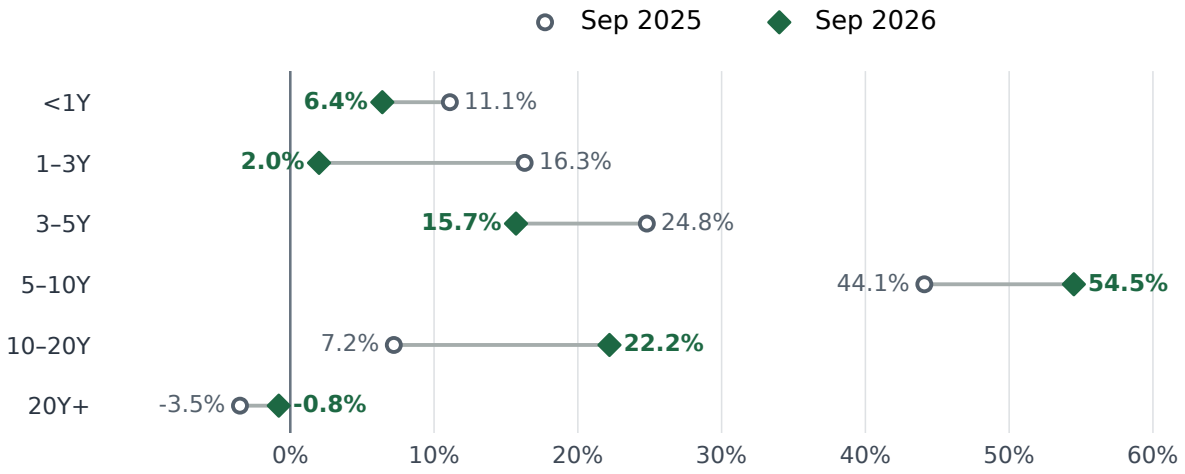

Duration rose chiefly in the 5–20 year buckets

PIMCO's 30 September factsheets give a like-for-like comparison of the same fund and SGD-hedged E share class.

Fund statistic	Sep 2025	Sep 2026	Change
Effective duration	5.21 years	7.36 years	+2.15 years
Benchmark duration	6.04 years	5.77 years	−0.27 years
Effective maturity	7.34 years	10.97 years	+3.63 years
Estimated gross USD YTM	6.25%	8.37%	+2.12 pp

PIMCO [2, 3], p. 1. "pp" means percentage points. Fund duration moved from 0.83 years below benchmark to 1.59 years above it.

The 5–10 year share rose from 44.1% to 54.5%

How to read the markers • Compare each maturity bucket's share of total duration at 30 Sep 2025 and 30 Sep 2026 (%). A negative value offsets sensitivity elsewhere. Sources [2, 3], p. 3.

The **10–20 year** share rose from **7.2% to 22.2%**. The 20-year-plus share moved from **−3.5% to −0.8%**. In September 2026, the **20-year-plus** bucket accounted for **5.3% of market value** in PIMCO's maturity chart and **−0.8% of duration-weighted exposure** in its duration chart. The two figures use different denominators. [2, 3]

In years of fund duration, the 5–10 year bucket rose from about **2.30** (5.21 × 44.1%) to **4.01** (7.36 × 54.5%). The 10–20 year bucket rose from about **0.38** to **1.63**. Other buckets offset part of those increases. The charts do not identify the trades behind them. [2, 3]

03 / CURRENCY HEDGING

A full hedge removes USD spot gains and losses

For a matched USD amount, selling USD forward fixes the SGD proceeds at the contracted exchange rate on the settlement date.

A full hedge gives no gain from a rise in USD/SGD.

If USD strengthens, the forward offsets the higher SGD value of the hedged dollars. If USD weakens, the forward offsets the lower SGD value. **Bond income and price changes still affect the investment.** [4, 5]

The cash flow at settlement

Let **U** be the hedged USD amount, **S** the settlement-date spot rate and **F** the contracted forward rate, both in SGD per USD. The SGD value of the dollars at spot plus the forward payoff is $\mathbf{U \times S + U \times (F - S) = U \times F}$. The settlement-date spot rate cancels on that matched amount. [4, 5]

Why the hedge can still change the return

The agreed forward rate can differ from today's spot rate. Short-term interest rates in the two currencies and the cross-currency basis affect forward pricing. At the next roll, the class transacts at the new prevailing rate. The forward points can reduce or increase the return in SGD. [4, 5]

What PIMCO documents

PIMCO describes a general process of rolling a share-class currency hedge **at least monthly** and adjusting it to the value of the assets. Asset prices and shareholder flows can change the amount that needs hedging between adjustments. [4]

June holdings record	What the schedule shows
2 Jul 2026 expiry	11 buy-SGD/sell-USD entries and 21 buy-USD/sell-SGD entries.
4 Aug 2026 expiry	7 buy-SGD/sell-USD entries.
Scope	39 entries pooled across six SGD share classes, including E Income. The schedule does not break out the E class's cost or show the original tenor of each contract.

Source [12], Hedge Classes worksheet, rows 324–362, at 30 Jun 2026. Contract counts are grouped by expiry and direction. These positions cannot establish a fixed 3.00% annual drag.

04 / THE TWO DIRECT BONDS

Both USD bonds have longer duration than the fund

The Treasury has a 2041 maturity. The Temasek note has a 2070 maturity, a corporate guarantor and issuer call provisions.

Contract or observation	U.S. Treasury 2041	Temasek Financial (I) 2070
ISIN	US912810TC27	US87973RAW07 (Reg S)
Issuer / support	United States Treasury	Temasek Financial (I) Ltd. Guaranteed by Temasek Holdings (Private) Ltd.
Fixed annual coupon	2.00% of face value	2.50% of face value
Final maturity	15 Nov 2041	6 Oct 2070
Price per US$100 face	67.15 reference, 5 Nov	50.000 indicative ask, 30 Oct
Published yield	5.24% gross YTM	5.551% indicative ask yield
Modified duration	11.7 years, 5 Nov	18.934 years, 30 Oct
If 3.00 pp is deducted	5.24% − 3.00% = **2.24%**	5.551% − 3.00% = **2.551%**

Sources [7–10]. The deductions are conditional arithmetic on the displayed figures. The venues use different price bases and do not establish a common yield-compounding convention. An unhedged USD holding retains USD/SGD exposure.

Coupon cash flow at the Temasek ask price

At the Bondsupermart clean ask of **50.000**, US$250,000 face costs **US$125,000 before accrued interest and charges**. The annual coupon is **US$250,000 × 2.50% = US$6,250**, paid in two US$3,125 instalments. Current yield on that clean cost is **5.00%**. The platform’s 5.551% ask yield also reflects the timing of principal repayment. [9, 10]

The issuer’s terms allow a make-whole call before **6 April 2070** and a par call from that date. The minimum denomination is US$250,000, with US$1,000 increments. A corporate-guaranteed note also carries issuer and guarantor credit risk. [9]

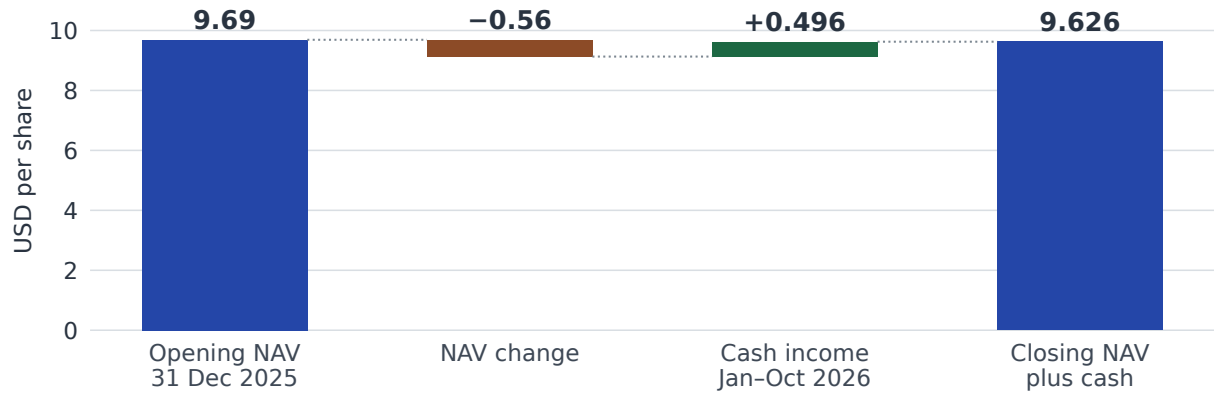

Later dealer indication. POEMS published a **50.41 ask and 5.508% ask yield** on 4 November. Under the same assumed deduction, 5.508% − 3.00% = **2.508%**. The 18.934-year duration above belongs to the 30 October Bondsupermart record. [10, 11]

05 / NAV AND CASH INCOME

The USD payout offset most of the NAV decline

One E Income USD share started 2026 at US$9.69 and stood at US$9.13 on 5 November. The two PIMCO exports allow the cash distributions to be added back explicitly.

NAV change and cash income per USD share

Original cash-flow arithmetic using dated NAV and ten cash distributions. This is not a daily price path. Sources [13, 14]; no reinvestment, investor charges or taxes.

For one share held throughout	USD per share
Opening NAV, 31 Dec 2025	9.69
Closing NAV, 5 Nov 2026	9.13
NAV change	−0.56
Ten ex-dividend amounts, Jan–Oct 2026	10 × 0.04960 = +0.49600
Closing NAV plus cash received	9.13 + 0.49600 = 9.62600
Change in NAV plus cash	9.62600 − 9.69 = **−0.06400**

Sources [13, 14]. Calculation assumes one share throughout with distributions retained in cash, no reinvestment and no investor-level charges or taxes. The export excludes special cash dividends.

An estimate of the investor’s loss based only on the **US$0.56 fall in NAV** would omit US$0.49600 of cash per share. A client’s actual gain or loss requires their purchase dates, units, transaction prices, charges and distribution elections. An SGD-hedged client also needs the SGD share-class record.

06 / MONTHLY PAYMENTS

The same USD payout had a different income mix each month

PIMCO reports how much of each distribution came from net distributable income and how much came from capital. The two columns refer to that month's payment.

USD ex-date	USD per share	Net distributable income	Capital
29 Jan 2026	0.04960	37.86%	62.14%
26 Feb 2026	0.04960	51.56%	48.44%
30 Mar 2026	0.04960	60.73%	39.27%
29 Apr 2026	0.04960	58.09%	41.91%
28 May 2026	0.04960	73.10%	26.90%
29 Jun 2026	0.04960	76.10%	23.90%
30 Jul 2026	0.04960	61.09%	38.91%
27 Aug 2026	0.04960	55.43%	44.57%
29 Sep 2026	0.04960	69.51%	30.49%
29 Oct 2026	0.04960	Undisclosed	Undisclosed

Source [14], Distribution worksheet, rows 4–13. PIMCO shows dashes for October's composition.

For January through September, the nine equal distributions total **US$0.44640** per share. Applying PIMCO's printed monthly capital percentages gives **US$0.17683888** attributable to capital. The 2026 October breakdown cannot be inferred from the unchanged payout.

What changed for SGD-hedged E Income

SGD ex-dividend dates, 2026	SGD per share	Change from July
30 July	0.045470	—
27 August, 29 September, 29 October	0.040177 each	−0.005293 per share

Source [6], Phillip Securities / POEMS' distribution history for IE00B9HH6X13. These amounts belong to the SGD E class. The USD workbook above belongs to IE00B8K7V925.

07 / CREDIT CONCENTRATION

Corporate issuers look larger inside the credit allocation

The 30 June holdings workbook reports 838 Corporate Bonds & Notes positions. Grouping them by exact legal description produces 342 issuer names.

Security quality in workbook	Positions	% of fund NAV[1]	% of corporate[2]
Investment grade	629	22.635%	84.21%
High-yield credit, incl. D	130	3.939%	14.65%
Quality field unreported	79	0.305%	1.13%
All Corporate Bonds & Notes	838	**26.879%**	100%

Source [12]. [1] Sum of published line-item NAV weights. [2] Divide each NAV subtotal by 26.879% and multiply by 100. Derived percentages shown to two decimals. Rounding can affect totals.

Two data-centre financings in the investment-grade segment

Issuer and project	% of NAV	% of corporate	% of IG
Beignet Investor LLC Meta / Hyperion, Louisiana	1.891%	7.04%	8.35%
RD Michigan Property Owner LLC Oracle / Stargate, Michigan	1.120%	4.17%	4.95%
Combined documented holdings	**3.011%**	**11.20%**	**13.30%**

Holdings rows 611 and 761 [12]. Project identification [15–18]. Corporate-sleeve denominator 26.879%. IG denominator 22.635%. Combined ratios use original weights before display rounding.

Beignet issued 6.581% notes due 30 May 2049. The June position has a reported value of **US$2,357,810,191**. **RD Michigan** issued 7.50% notes due 30 March 2045. The June position has a reported value of **US$1,395,422,965**. These are project-company obligations. The project users are Meta and Oracle/OpenAI, respectively. [12, 15–18]

A security-level rating matters. The workbook assigns CAA+ to the BNP Paribas Issuance BV position. Its **1.404% of fund NAV** represents **35.64%** of the high-yield corporate segment. That classification applies to the instrument in this file. [12]

The September factsheet separately reports 17.4% investment-grade credit and 4.4% high-yield credit on a gross-market-value basis [2, pp. 2, 4]. The date, sector definition and denominator differ from the June workbook.

P-BIG held US technology and Korean equities

PIMCO's Balanced Income and Growth Fund has a separate portfolio. Its September 2026 M Retail Income II SGD-Hedged factsheet reports a year-to-date return of 8.93% after fees, with distributions reinvested. [19]

What is known about the Magnificent Seven

P-BIG position at 30 Jun 2026	% of market value
NVIDIA	2.5%
Apple	1.9%
Microsoft	1.3%
These three disclosed holdings	**5.7%**

Source [19], p. 2. PIMCO's top-ten holdings exclude derivatives and carry a three-month reporting lag in this factsheet.

On 30 September, PIMCO reported **42.3% US equities**, **12.9% developed ex-US equities** and **10.0% emerging-market equities** on its market-value allocation chart. Beginning or ending weights alone cannot establish how many percentage points of the fund's return came from any stock. [19, p. 3]

South Korea and return attribution

PIMCO's 2025 annual report says its long exposure to South Korean equities contributed positively to performance that year. At 31 December 2025, three disclosed equity lines comprised Samsung Electronics common **0.89%**, Samsung Electronics preferred **0.30%** and SK Hynix common **0.74%** of fund NAV, or **1.93%** combined. [20]

These three holdings establish Korean company exposure at that reporting date. The current total South Korean allocation remains unverified. A full country allocation requires all relevant assets and derivatives. KRW currency exposure also depends on currency positions and hedges. [19, 20]

The factsheet cannot attribute the run-up to the Magnificent Seven.

It reports total fund performance and selected holdings. A seven-stock contribution in percentage points requires period attribution with trading and the treatment of derivatives. The country chart on page 3 measures the bond portfolio's duration in years by settlement currency. [19]

09 / READING THE SWITCH COMPARISON

A switch changes what drives the client's result

The two direct bonds have higher measured rate sensitivity. PIMCO retains broad credit and mortgage exposure, plus an actively managed duration profile.

Client exposure	PIMCO Income E SGD-Hedged	Direct USD bonds
Interest-rate sensitivity	7.36 years of effective duration, 30 September.	11.7 years modified for UST 2041. 18.934 for Temasek 2070, on their respective dates.
Principal and cash flows	Units redeem at the prevailing NAV. The class aims to pay monthly and may distribute capital.	USD coupons are contractual. Principal and coupon payments depend on the issuer meeting its obligations. The Temasek terms permit early redemption.
Credit and spread risk	Agency MBS 35.4%, IG credit 17.4%, HY credit 4.4% of gross market value at 30 September.	UST is US sovereign debt. The Temasek note is a claim on its issuing vehicle with a Temasek Holdings guarantee.
Currency outcome	The class hedges the fund's USD base currency to SGD. The roll affects its return.	An unhedged holding gains or loses in SGD as USD/SGD moves. Hedging the same amount removes spot gains and losses and introduces forward carry.
Cost measurement	The unified E share-class fee is 1.45% p.a. Published net returns incorporate fund fees.	Direct ownership avoids an E share-class fee. The investor still faces the trading spread and any applicable transaction, custody or hedge costs.

Sources [1–5, 7–11]. The fund's effective duration and the bonds' modified durations use different methods. A duration calculation is a first-order sensitivity. Changes in the curve, credit spreads, mortgage prepayments and bond call options can affect actual prices.

How much price sensitivity changes

For a small parallel move in yield, **percentage price change ≈ −duration × change in yield (percentage points)**. On the reported figures, the direct bonds have **4.34** and **11.574** more years of measured sensitivity than the fund, respectively. The fund's credit and mortgage exposures can also change its NAV independently of a Treasury yield move. [2, 8, 10]

Inputs needed to calculate a client's switch

Use the client's exact **share class, redemption value and distribution history**. Record each bond's **executable ask, accrued interest, settlement date, dealing and custody costs**. If the desired outcome is in SGD, include the corresponding forward price and the USD exposure to be hedged. A trade-specific comparison depends on these inputs.

APPENDIX A / PIMCO INCOME CORPORATE ISSUERS

Issuer ranks 1–17

30 June 2026 • Corporate Bonds & Notes • Ranked by summed position weights as a percentage of fund NAV

#	Legal issuer	Fund NAV	Corporate	IG sleeve	HY sleeve
1	Beignet Investor LLC	1.891%	7.04%	8.35%	—
2	BNP Paribas Issuance BV	1.404%	5.22%	—	35.64%
3	RD Michigan Property Owner LLC	1.120%	4.17%	4.95%	—
4	Pacific Gas & Electric Co.	0.874%	3.25%	3.86%	—
5	Ford Motor Credit Co. LLC	0.872%	3.24%	3.85%	—
6	Gaci First Investment Co.	0.814%	3.03%	3.60%	—
7	BPCE S.A.	0.688%	2.56%	3.04%	—
8	QNB Finance Ltd.	0.656%	2.44%	2.90%	—
9	UBS Group AG	0.432%	1.61%	1.91%	—
10	SW Finance PLC	0.402%	1.50%	1.78%	—
11	NatWest Group PLC	0.370%	1.38%	1.63%	—
12	Barclays PLC	0.357%	1.33%	1.58%	—
13	DISH DBS Corp.	0.340%	1.26%	—	8.63%
14	Petroleos Mexicanos	0.310%	1.15%	1.37%	—
15	Emirates NBD Bank PJSC	0.289%	1.08%	1.28%	—
16	Banco Santander S.A.	0.287%	1.07%	1.27%	—
17	Nissan Motor Acceptance Co. LLC	0.279%	1.04%	—	7.08%

Source [12], Portfolio Holdings. Corporate = issuer NAV weight ÷ 26.879% × 100. IG = issuer IG NAV weight ÷ 22.635% × 100. HY = issuer below-IG NAV weight ÷ 3.939% × 100. A dash means the issuer has no reported weight in that segment. Derived ratios shown to two decimals.

Example. Beignet accounts for 1.891% of the fund. Its corporate weight is **1.891 ÷ 26.879 × 100 ≈ 7.04%**. The entire position is IG, so its share of IG corporate bonds is **1.891 ÷ 22.635 × 100 ≈ 8.35%**.

APPENDIX A / PIMCO INCOME CORPORATE ISSUERS

Issuer ranks 18–34

30 June 2026 • Corporate Bonds & Notes • Ranked by summed position weights as a percentage of fund NAV

32	Goldman Sachs Bank USA	0.203%	0.76%	0.90%	—
33	UBS AG	0.202%	0.75%	0.89%	—
34	Anglian Water Services Financing PLC	0.200%	0.74%	0.88%	—

Source [12], Portfolio Holdings. Corporate = issuer NAV weight ÷ 26.879% × 100. IG = issuer IG NAV weight ÷ 22.635% × 100. HY = issuer below-IG NAV weight ÷ 3.939% × 100. A dash means the issuer has no reported weight in that segment. Derived ratios shown to two decimals.

Issuer treatment. UBS Group AG and UBS AG appear as separate entries, as do Goldman Sachs Group, Inc. and Goldman Sachs Bank USA. Where different entities belong to a common parent, this ranking reports each separately. Ties are sorted alphabetically.

APPENDIX A / PIMCO INCOME CORPORATE ISSUERS

Issuer ranks 35–50

30 June 2026 • Corporate Bonds & Notes • Ranked by summed position weights as a percentage of fund NAV

#	Legal issuer	Fund NAV	Corporate	IG sleeve	HY sleeve
35	Carvana Co.	0.200%	0.74%	—	5.08%
36	JPMorgan Chase & Co.	0.197%	0.73%	0.87%	—
37	Boeing Co.	0.196%	0.73%	0.87%	—
38	Deutsche Bank AG	0.180%	0.67%	0.80%	—
39	Wells Fargo & Co.	0.178%	0.66%	0.79%	—
40	Lloyds Banking Group PLC	0.176%	0.65%	0.78%	—
41	Morgan Stanley Bank N.A.	0.176%	0.65%	0.78%	—
42	NTT Finance Corp.	0.169%	0.63%	0.75%	—
43	Venture Global Calcasieu Pass LLC	0.167%	0.62%	0.74%	—
44	Jackson National Life Global Funding	0.166%	0.62%	0.73%	—
45	Santander Holdings USA, Inc.	0.160%	0.60%	0.71%	—
46	Southern California Edison Co.	0.157%	0.58%	0.69%	—
47	Nissan Motor Co. Ltd.	0.146%	0.54%	—	3.71%
48	Flora Food Management BV	0.145%	0.54%	—	3.68%
49	Altice France S.A.	0.144%	0.54%	—	3.66%
50	GA Global Funding Trust	0.142%	0.53%	0.63%	—

Source [12], Portfolio Holdings. Corporate = issuer NAV weight ÷ 26.879% × 100. IG = issuer IG NAV weight ÷ 22.635% × 100. HY = issuer below-IG NAV weight ÷ 3.939% × 100. A dash means the issuer has no reported weight in that segment. Derived ratios shown to two decimals.

Top 50 total. The sum is **18.198% of fund NAV**, equal to approximately **67.70%** of the published corporate-weight subtotal. Of that NAV weight, 15.295% is investment grade and 2.903% is high-yield credit.

APPENDIX B / RECONCILIATION

How the denominators change the answer

The June holdings, the September factsheet and the USD payouts each answer a different measurement question.

June fund weights and corporate weights

The June workbook contains **8,500 investment line items**, followed by totals. It reports total investments of **US$180,725,774,566**, net other current assets and liabilities of **−US$55,976,239,030**, and net assets of **US$124,749,535,536**. Relative to NAV, these are 144.871%, −44.871% and 100%. [12]

The corporate-issuer ranking sums the published line weights in column O. Each is reported to 0.001% of NAV. A separate calculation from unrounded dollar values yields **US$33,513,671,592 ÷ US$124,749,535,536 × 100 ≈ 26.86477%**, versus the **26.879%** sum used throughout the ranking. These are two precision conventions for the same workbook.

How the quality split was calculated

Segment	QUALITY codes observed in corporate rows	Fund NAV
Investment grade	AAA, AA+, AA, AA−, A+, A, A−, BAA+, BAA, BAA−	22.635%
High-yield credit, incl. D	BA+, BA, BA−, B+, B, B−, CAA+, CAA, CAA−, CA, D	3.939%
Unreported	A dash in the QUALITY field	0.305%

Credit quality is assigned to the security in the workbook. Only positions labelled **Corporate Bonds & Notes** enter the denominator. Loans, mortgage-backed securities, asset-backed securities and government issues are outside it. [12]

Why a factsheet can show a smaller Beignet weight

The September factsheet lists the Beignet security at **1.1%** in its top holdings, measured at **30 June** and expressed on a gross-market-value basis. The June holdings workbook reports **1.891% of net assets**. The same security can have different percentages when the denominator changes. [1, 12]

The factsheet’s sector chart likewise defines gross market value using total portfolio gross market value and excludes reverse repos and credit lines from that calculation. Its 17.4% IG and 4.4% HY sector figures should be read on the factsheet’s own basis. [2]

Fund documents, hedge mechanics and bond prices

Numbers in square brackets refer to these records. PIMCO authored the linked factsheets. Some copies are hosted by distributors. Quote links can update after their observation dates.

01 PIMCO GIS Income Fund • E USD factsheet
30 Sep 2026. Pages 1–4 cover the portfolio, E Income shares, returns, credit exposure and YTM methodology.

02 PIMCO GIS Income Fund • E SGD-Hedged factsheet
30 Sep 2026. Pages 1–5 cover the share class, distributions, risk measures, duration buckets and gross market value.

03 PIMCO GIS Income Fund • historical E SGD-Hedged factsheet
30 Sep 2025. Pages 1 and 3 give the prior-year statistics and duration buckets for the same share class.

04 PIMCO Singapore • Understanding Hedged Share Classes
The sections on hedge implementation, interest rates and basis describe the general share-class mechanics.

05 Bank for International Settlements • Annual Economic Report 2025, ch. II
Box A and its notes explain forward pricing, rolling contracts and hedging costs.

06 Phillip Securities / POEMS • E SGD-Hedged distribution history
Ex-dividend ledger for IE00B9HH6X13. July through October 2026.

07 U.S. Treasury • 20-year bond auction results
17 Nov 2021. Original issue terms for CUSIP 912810TC2, 2% due 15 Nov 2041.

08 Borsa Italiana / EuroTLX • UST 2041 effective yields
5 Nov 2026 reference price, gross YTM and modified duration, with analytics credited to Skipper Informatica.

09 Temasek Financial (I) • Series 21 pricing supplement filed with SGX
29 Sep 2020. Terms, maturity, guarantee, coupon, denominations and optional redemption.

10 Bondsupermart • Temasek 2.500% 2070, Reg S
30 Oct 2026. Platform’s indicative full-lot ask and modified duration for ISIN US87973RAW07.

11 Phillip Securities / POEMS • Temasek 2070 bond screener
4 Nov 2026. Separate, later indicative bid and ask quotation.

Holdings, distributions and project documentation

Source workbooks are retained for audit and are not publicly distributed.

12 PIMCO GIS Income Fund • portfolio holdings and hedge classes
Unaudited, 30 Jun 2026. Portfolio Holdings rows 19–8518, fields F/G/N/O/Q. Hedge Classes rows 324–362.

13 PIMCO Asia • Historical NAV Chart
6 Nov 2026 export. Historical NAV worksheet. PIMCMEI, E Income USD, through 5 Nov 2026.

14 PIMCO Asia • Distribution Chart
6 Nov 2026 export. Distribution rows 4–13 give the Jan–Oct 2026 ex-dates, per-unit payments and income/capital splits.

15 Blue Owl Real Estate Net Lease Trust • 2025 Form 10-Q
SEC-hosted trust filing, Note 18, Subsequent Events. Identifies the Beignet issuer, data-centre project, notes and Meta relationship.

16 Meta • Hyperion joint venture with Blue Owl-managed funds
21 Oct 2025. Meta describes its Louisiana project and identifies PIMCO among the debt investors.

17 KBRA • RD Michigan Property Owner I LLC senior secured notes
1 May 2026. KBRA's own issue-rating publication identifies the project issuer and the Oracle lease.

18 Oracle • Michigan Stargate campus construction announcement
1 Jun 2026. Project parties identify the Oracle/OpenAI campus and PIMCO-managed funds and accounts as anchor lenders.

19 PIMCO Balanced Income and Growth Fund • M Retail Income II SGD-Hedged
30 Sep 2026. Pages 1–3 give the share-class return, June top holdings, September allocation and fixed-income duration by country.

20 PIMCO GIS • 2025 annual report
31 Dec 2025. P-BIG manager commentary, p. 8, and schedule of investments, p. 146, covering Samsung and SK Hynix.

Design reference • Winston Ng's Colour & Tagging Standard V1.2 Merged, 5 Nov 2026. The research uses the light palette, direct labels and DejaVu Sans as in the visual guide. Colours identify topics and entities. Signs, labels and units carry the meaning in greyscale.
